

# Information Report

A report gives information about an object, person, place or animal. It tells what it looks like, where it is and what it can do.

Look at the report below about frogs. Find information in the report that can be placed in the report plan. Draw a line from the headings below to the correct information in the report.

## Frogs

Frogs belong to a group of animals called amphibians. Amphibians can live in water and on land.

Frogs have four legs and no tail. Some frogs have spots and stripes.

Their colour helps to camouflage them. Frogs have wet skin and bulgy eyes.

Frogs live in damp places. The tree frog lives in trees. Other frogs live in ponds or creeks.

Frogs lay eggs in the water. Frogs come out at night. They make croaking noises. Frogs jump high. Some frogs climb trees.

Frogs eat insects and spiders. Some frogs eat other frogs.
