## Geometry Lyrics

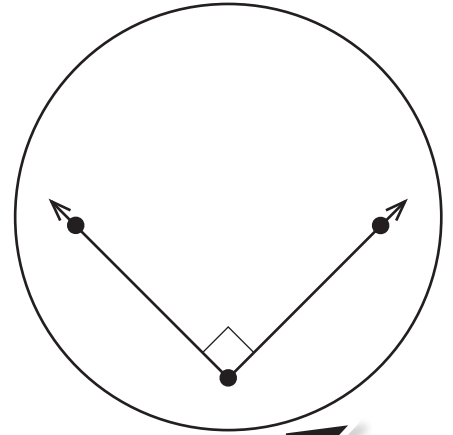

Name and measure these angles.

### Angles Song

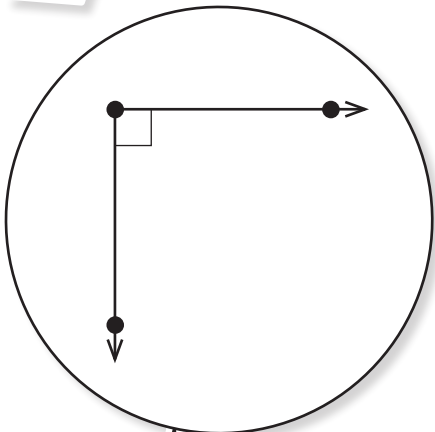

(To the tune of 'Bingo')

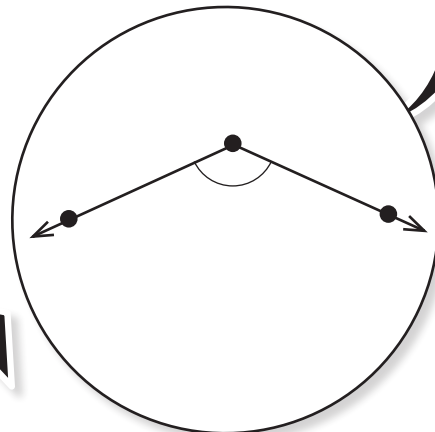

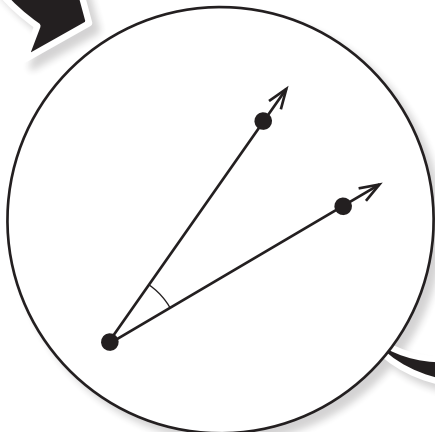

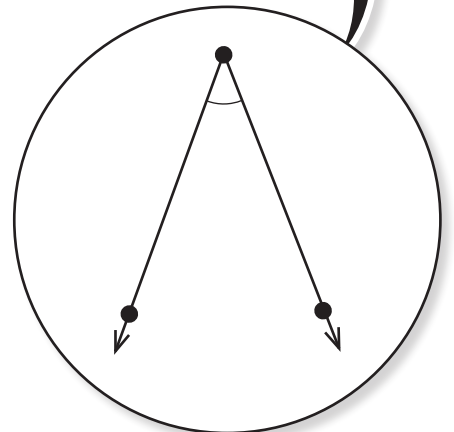

There was an angle had a name  
And Righty was his name-o  
Square corner just like so  
(repeat 2 more times)  
And Righty was his name-o

There was an angle had a name  
And Acute was his name-o  
Closed and cute just like so  
(repeat 2 more times)  
And Acute was his name-o

There was an angle had a name  
And Obtuse was his name-o  
Open wide just like so  
(repeat 2 more times)  
And Obtuse was his name-o!

# Geometry Lyrics

Link the triangles to the right verse.

## Triangle

(To the tune of 'Here We Go Round the Mulberry Bush')

Here we go round the triangle, triangle, triangle

Here we go round the triangle

It's geometry

Equilateral triangle,  
triangle, triangle  
Equilateral triangle  
Three congruent sides

Isosceles triangle,  
triangle, triangle  
Isosceles triangle  
Two congruent sides

Scalene triangle, triangle, triangle  
Scalene triangle  
No congruent sides

This-is-a-right triangle,  
triangle, triangle  
This-is-a-right triangle  
A right angle it has

Give me my triangle, my triangle (repeat twice)

# Geometry Lyrics

Are these lines parallel or perpendicular?

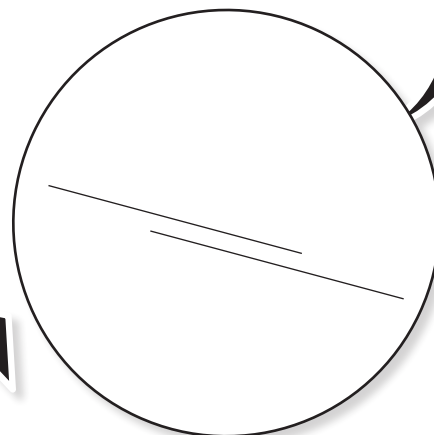

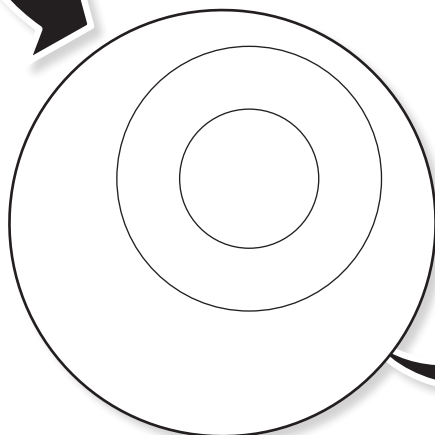

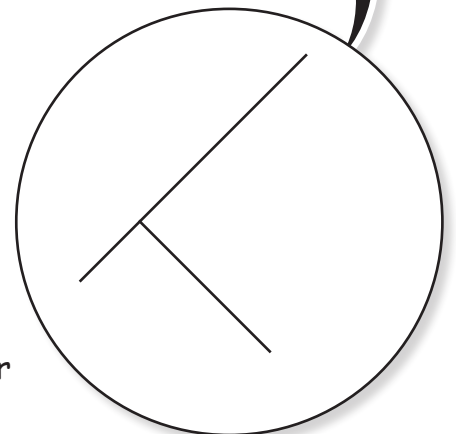

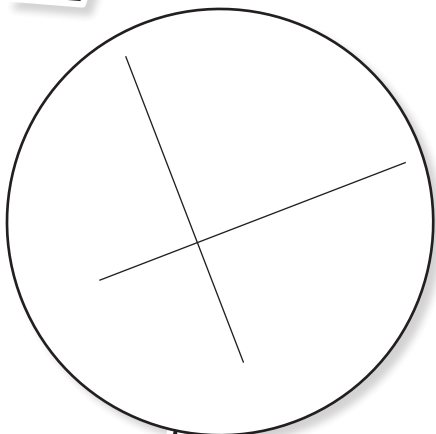

## Parallel or Perpendicular

(To the tune of  
'Do Your Ears Hang Low?')

Do you see Parallel  
Lookin' like a double 'l'?  
Lines that never cross  
Never would as well

But when two lines come together  
Makin' right angles, we yell...

Perpendicular  
Parallel,  
Lines that never cross  
Or Perpendicular,  
Two lines when they come together  
Parallel or Perpendicular

# Geometry Lyrics

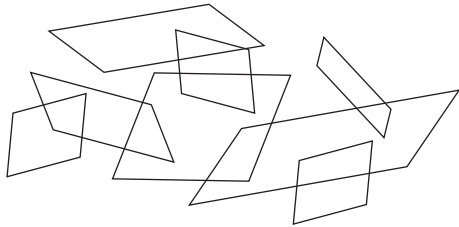

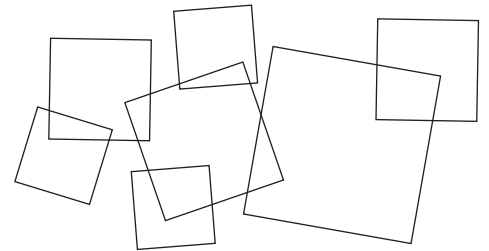

Patterns to colour in.

## Quadrilateral Dance

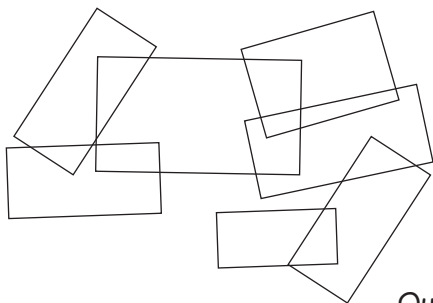

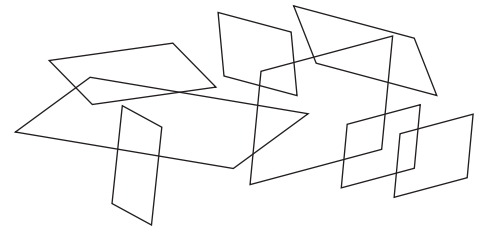

(Sung to the tune of 'Father Abraham'—The Smurfs Theme Song)

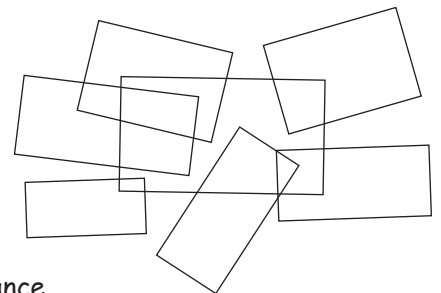

Quadrilateral has many shapes  
Many shapes has quadrilateral  
A square is one of them  
Congruent sides  
And four right angles too  
Right arm

Quadrilateral has many shapes  
Many shapes has quadrilateral  
A parallelogram, opposite sides  
Both sets are parallel  
Right arm, left arm

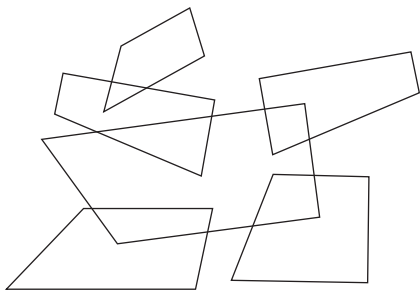

Quadrilateral has many shapes  
Many shapes has quadrilateral  
Rectangle's one of them  
The corners square  
Four right angles around  
Right arm, left arm, right leg

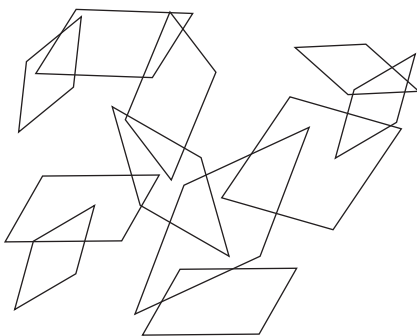

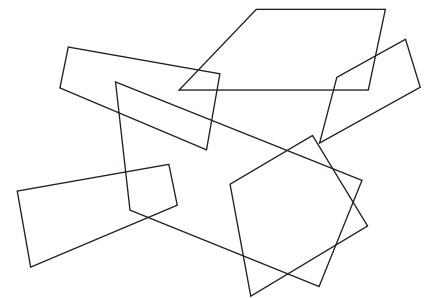

### Chorus

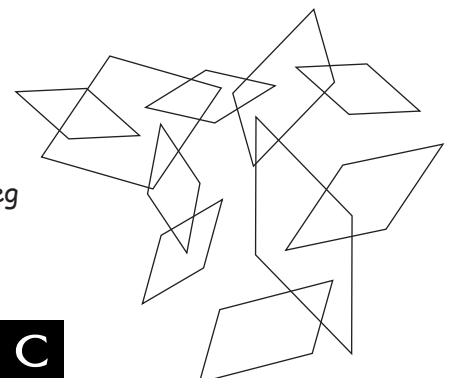

Quadrilateral, we do the quadrilateral dance  
Let's do the quadrilateral  
We do the quadrilateral dance

Quadrilateral has many shapes  
And many shapes has quadrilateral  
A trapezoid is one, two parallel  
But the other two are not  
Right arm, left arm, right leg, left leg

Quadrilateral has many shapes  
Many shapes has quadrilateral  
Rhombus could be a square  
Or diamond too  
Must have congruent sides  
Right arm, left arm, right leg, left leg  
SIDES!

(Chorus)
