

MAKARAKA SCHOOL

Makaraka School is a semi-rural school on the southern outskirts of Gisborne. The roll of 126 Years 1 to 6 students includes 42% who identify as Māori

At Makaraka School, we have successfully implemented the PR1ME Maths program over the past seven years, and we take great pride in the results it has brought to our mathematics teaching. Our learners are confident mathematicians, consistently demonstrating enthusiasm for their learning, along with strong problem-solving and critical thinking skills.

Our data clearly shows that PR1ME Maths works for our students. The 2023 end-of-year achievement results speak for themselves: 93% of our students are performing at or above the current expected curriculum level in mathematics.

We believe that PR1ME Maths offers a high-quality, structured approach to teaching mathematics. Our teachers no longer need to guess or make decisions about what to teach next; the clear sequence in the Course and Practice Books ensures a systematic and logical progression of concepts. Each lesson builds carefully on prior knowledge, reinforcing what has already been taught, without introducing concepts out of context.

Ultimately, our students thrive under the structure and challenge of PR1ME Maths. We are proud of the results we've achieved and are excited to continue this success in the years to come.
